

Training Course in fMRI Program Announcement

When: August 6-17, 2018

APPLICATION DEADLINE: JANUARY 15, 2018.

Details of the course as it was offered in past years can be found at:

<https://fmri-training-course.psych.lsa.umich.edu>

APPLICATIONS FOR DOWNLOADING CAN BE FOUND AT THE FOLLOWING WEBSITE: <https://fmri-training-course.psych.lsa.umich.edu>

QUESTIONS CAN BE DIRECTED TO:

Mary Mohrbach
mohrbach@umich.edu

The University of Michigan announces a training course in functional magnetic resonance imaging (fMRI). Functional MRI has become an important addition to the toolbox of cognitive and affective neuroscientists, but substantial training is required to implement an fMRI experiment. The University will offer a 2-week intensive course from August 6-17, 2018, that will train attendees on the motivation for using fMRI, the physics that underlies the technique, the design of experiments, the acquisition of data, the analysis of those data, and the interpretation of brain activations that result. The course is intended for potential users of the technique, including graduate and postdoctoral students, as well as established biomedical researchers who wish to incorporate this technique into their work. Via the sponsorship of a grant from the National Institutes of Health, the course is able to enroll up to 25 students from outside the University of Michigan, and to support the travel and subsistence costs of those visitors. Entrance into the course is by application only, Applicants must be a US Citizen or permanent resident.
